In every locality there will be a group of more complex drinkers, whose alcohol use and associated lifestyle contributes to a pattern of more frequent contact with a range of frontline services. They are often characterised by the complexity of the needs, multi- morbidity and exclusion from society. This is a highly diverse service user group whose social circumstance ranges from being housed to being homeless or having temporary accommodation, involved in the criminal justice system, commonly experiencing mental health problems, facing financial difficulties and lacking in social capital or support networks. The service is based on developing best practice to assertively engage and sustain medium to long term change with those who are considered to be change or treatment resistant. Assertive outreach is an intensive approach and requires persistent work over a period of time – usually several months. The CHI (Catalyst High Impact) team members focus on building a positive relationship with the ‘client’ and motivate them towards treatment and other necessary support services which could facilitate recovery and improve access to and/or maintain engagement in treatment, improve social and community outcomes and reduce the demand on crisis/emergency services.</p>	£25,000.00

Tall Ships Youth Trust	Sailing Beyond Expectations	Our aim is to enable 10 young offenders (or young people at risk of offending) from Surrey to take part in a Tall Ships Youth Trust voyage (TSYT). Experience tells us that young offenders need help to break free of crime and learn how they can build a positive future. They are often from disadvantaged backgrounds, lacking the self-esteem and confidence to reach their potential. They may be facing numerous issues due to their circumstances, including bullying, isolation, gang culture and negative peer pressure with a greater risk of alcohol, drug or substance misuse. Most reduce their expectations from life and even take out their frustrations on those around them. Reducing Reoffending Fund

Org.	Project	Desc.	Sum agreed
York Road Project	Reducing Reoffending by Supporting Homeless people off the Streets	In January 2017 an application for funding was received from the York Road Project to support a scheme which encourages homeless people off the streets. By supporting the salary costs of an outreach worker the project will contribute towards the reduction of reoffending in Surrey.	
The Amber Foundation	Amber	This application is for funding for three bed spaces at Farm Place for the next three years, to support young people from Surrey who are at risk of reoffending or who may be susceptible to antisocial behaviour in their communities. Priority for these bed spaces would be given to Integrated Offender Management referrals.	£37,500.00
Transform Housing	PCC Housing	Transform will invest in providing two shared houses (8 beds) that will offer supported accommodation to ex offenders in Surrey. Clients are provided with a keyworker and encouraged to recognise the triggers behind their previous offending. The support provided will vary depending on need but includes assisting clients to improve their economic wellbeing; to develop a fulfilling weekly structure through employment, voluntary work or education and leisure activities; to better manage any physical or mental health needs; to address any substance misuse issues; to successfully complete any statutory court orders; to keep to the terms of their licence agreement and maintain their accommodation; to improve their self-confidence and independent living skills and to make a positive contribution to society.	£31,638.00
Women in Prison	Checkpoint Navigator	As the current Transforming Women's Justice project transitions into Checkpoint we are seeking funding to retain one full time county wide specialist Checkpoint worker to be based at the Women's Support centre to work with women experiencing multiple disadvantage. As with the current WJI workers the aim will be to divert women out of the formal criminal justice system and into a holistic support package. The support provided includes sessions around key pathways to offending including mental health needs, substance misuse and domestic abuse. Women referred receive one to one support from a specialist worker who can refer on to specialist partner agencies and can provide advocacy around for example, accommodation and health issues.	£41,130.00

Women in Prison	WSC Counselling service	This service will continue to provide a specialist counselling intervention for women who in addition to their involvement in the CJS have also often been victims of crime or abuse. In particular, the counselling service will offer ongoing counselling to women who are referred to the new Checkpoint programme and other women in Surrey who have experienced domestic abuse, sexual abuse, exploitation, trafficking or other trauma and who are involved in or at risk of involvement with the CJS.	£11,275.00
Circles South East	Surrey Reducing Sexual Harm Circles Project	Currently service provision across Surrey has been attached to contract arrangements with the National Probation Service with a small funding contribution from Surrey OPCC towards volunteer training and development. This project would formalise co-commissioning arrangements between the National Probation Service and Surrey OPCC and facilitate the development of services across Surrey. We wish to strengthen the transition for offenders from Prison to Community through providing a new Through the Gate model whilst offering tailored pathways of support through interventions ranging from one to one support, paired mentoring through to the core Circle model (option to receive Adapted Circle). This proposal will ensure the growth and development of service provision and a flexibility of the core Circle model to ensure a more responsive and flexible service for core members. It is our aim that the service will be embedded within the Reducing Sexual Harm Hub so that core provision will be supported by the range of additional services for partners and family members.	£32,250.00
Food Matters	Food Matters TTG	'Food Matters Through the Gate' is a new project which supports offenders during resettlement. The project, which is initially planned over a year, aims to enable offenders to make healthier, more informed food choices to support their physical and mental well-being and that of their families. Food provides not only nutrition for health, but also opportunities: for social interaction, to strengthen family ties, as a means to express and reinforce cultural or religious identity, and to give pleasure in what might otherwise be a difficult and stressful life. Poor diet is known to impact on physical and mental health, both of which are important for successful rehabilitation.	£5,000.00

PIE is an evidence based (evaluation undertaken by Southampton University) model of support where it is recognised that 70% of those experiencing homelessness have experienced some kind of childhood trauma. This trauma directs how they feel about themselves and how they behave. This behaviour may include an increase in offending, poor mental health and an increased likelihood of substance misuse.</p> <p>PIE is an organisational wide approach and is underpinned by reflective practice which allows staff to meet with a clinical psychologist on a monthly basis to discuss difficult cases. St Basils have been delivering PIE since 2012 and have a wealth of data to evidence the success in reducing re-offending and homelessness.</p>	£5,000.00
